

## Annexure – 1

INT219 Web development

### Project Report

Submitted in partial fulfilment of the requirements for  
the award of degree of

Bachelor Of Technology

(Computer Science and Engineering)

Submitted to

LOVELY PROFESSIONAL UNIVERSITY

PHAGWARA, PUNJAB

### SUBMITTED BY

Name Of Student :- Rishaad Khan

Registration Number :- 12002195

Roll No. :- RKM114A03

## **A Tech Review blog website**

A responsive multi page website built using HTML, CSS, Javascript, bootstrap and JQuery. This website has a landing page about us, contact us, separate single blog page , and a pure blog page.

Html is used to give the structure of the page, css to design and align the contents of the page.

Javascript and jquery are used to make the site interactive.

Bootstrap libraries are also used in place of css and javascript to make the code look cleaner.

A few other online tools are used such as google fonts, and favicon to make the site look a bit more appealing.

Furthermore we can use backend frameworks to make the site fully practical and easy to use by other peoples.

### **Technologies used**

1.Html- The HyperText Markup Language or HTML is the standard markup language for documents designed to be displayed in a web browser.

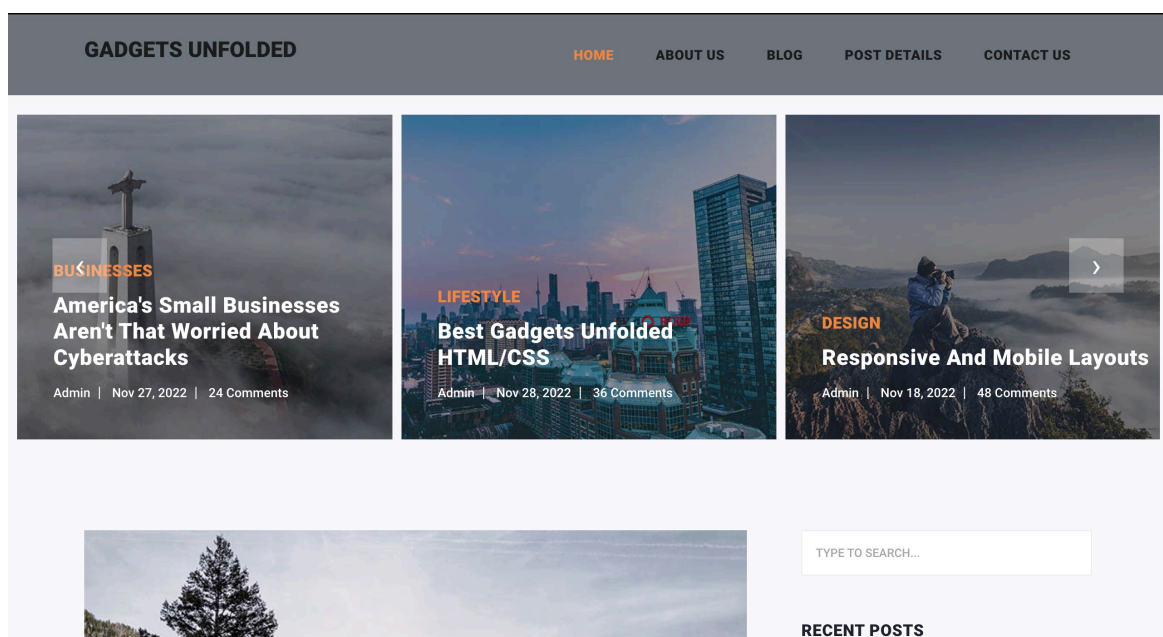

2.CSS- Cascading Style Sheets is a style sheet language used for describing the presentation of a document written in a markup language such as HTML or XML. CSS is a cornerstone technology of the World Wide Web, alongside HTML and JavaScript.

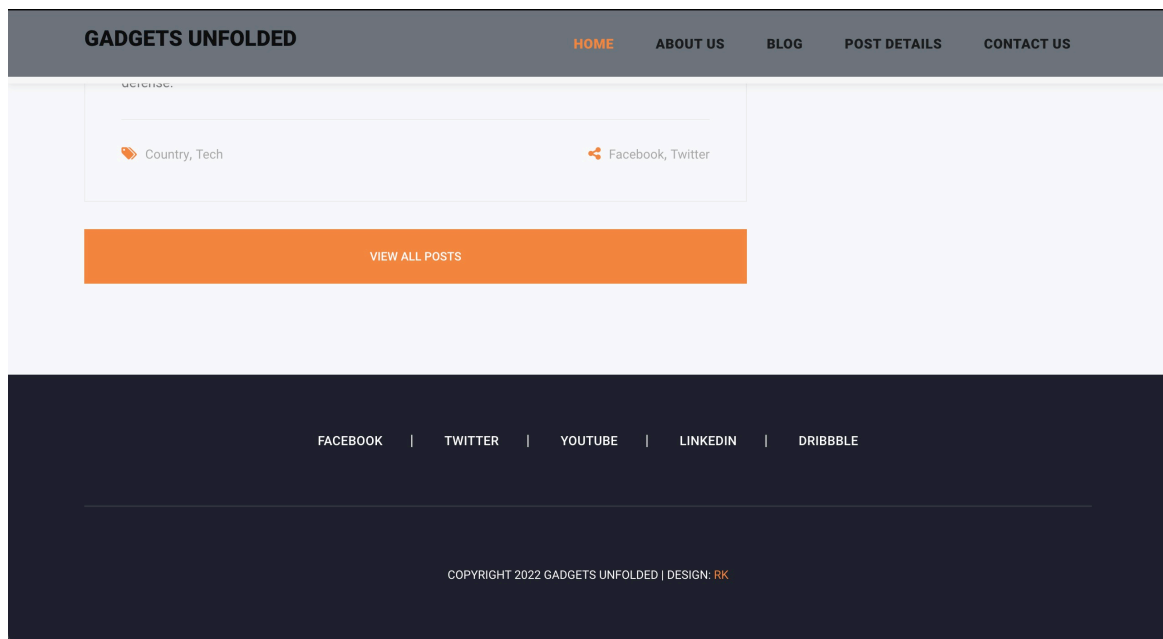

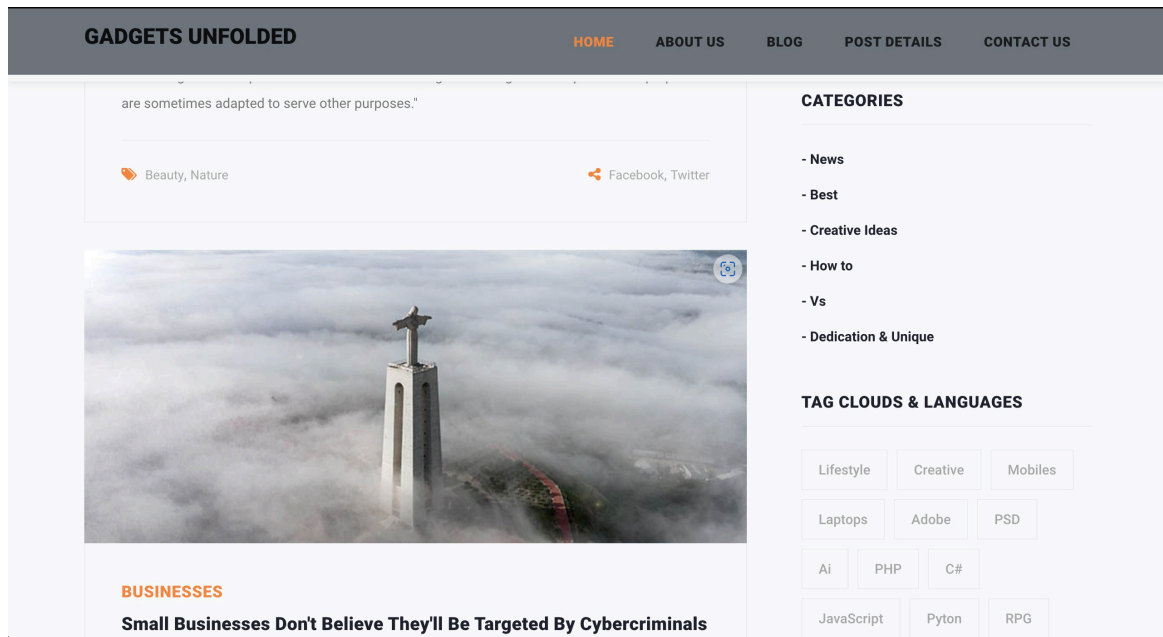

3.Javascript- JavaScript, often abbreviated as JS, is a programming language that is one of the core technologies of the World Wide Web, alongside HTML and CSS.

4.Bootstrap- Bootstrap is a free and open-source CSS framework directed at responsive, mobile-first front-end web development. It contains HTML, CSS and JavaScript-based design templates for typography, forms, buttons, navigation, and other interface components.

5.Jquery- jQuery is a JavaScript library designed to simplify HTML DOM tree traversal and manipulation, as well as event handling, CSS animation, and Ajax. It is free, open-source software using the permissive MIT License.
